Per profile 90/100 cm: 1 set is needed, per profile 270 cm: 3 sets.

**Prinz PS 400 Cable Ducts**

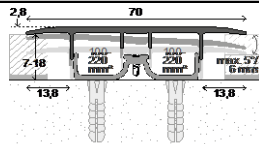

- > Screwing section system with aluminium upper and base profile.
- > For covering thicknesses from 7 - 18 mm.
- > For a concealed laying of cables in parquet / laminate floorings.
- > Continuously variable adaptation of both height and inclination.
- > Optimal frictional connection by using drilling screws DIN 7505P.
- > Base and upper section incl - fixing material are shrink-wrapped together.
- > Patent No. 1442687.

### Prinz Profi-Tec XXL System

- > Clip profile system with aluminium top-section and PVC base section.
- > For covering thicknesses 16 - 23,5 mm.
- > Continuously variable adaptation of both height and inclination.
- > Simple, fast and reliable installation - trouble-free disassembly and reusability.
- > Base and upper section are the shrink-wrapped together.
- > We recommend gluing the base profile. No fixing material for the base profile enclosed.

|--------|----------------|------------------------|--------------|------------|--------|-------|--------------|--------|--------------------------|

- > Suitable for covering thicknesses from 6 - 12 mm.
  - > Automatic adaptation of both height and inclination.
  - > Base and top section are shrink-packed together.
  - > We recommend gluing the base profile. No fixing material for the base profile enclosed.
- > DBGM 20 2019 100 871

Prinz LPS Design System

- > Schraubprofilssystem mit Aluminium-Oberprofil und Aluminium-Basisprofil.
- > Konstruiert für Designbeläge mit Belagstärken von 3,5 - 8,5 mm.
- > Inklusive TORX-Schrauben
- > Basisprofil und Oberprofil zusammen verpackt inkl. Befestigungsmaterial.

**Prinz Profi-Design System**

- > Clip profile system with aluminium top section and PVC base section.
- > Suitable for design floorings (Vinyl) with thicknesses from 4 up to 7,5 mm.
- > Continuously variable adaptation of both height and inclination.
- > Simple, fast and reliable installation - trouble-free disassembly and reusability.
- > Base and upper section are shrink-wrapped together.
- > We recommend gluing the base profile. No fixing material for the base profile enclosed.
- > DBGM (Deutsches Bundesgebrauchsmuster) 20 2012 102 304.

### Design Step stair nosing system

- > Stair nosing system for renovating stairs with design coverings.
- > Upper and base section made of aluminium.
- > Suitable for covering thicknesses of 4.0 - 6.5 mm.
- > Upper and base section packed together incl. fixing material.
- > The system is offered in two versions: a) as a screw system (type 331), b) as a clip system with concealed fastening (type 330).
- > DBG M 20 2019 100 158

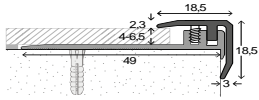

### Design Step clip system type 330 - upper profiles are snapped into the base profile, without visible fixing.

**Prinz D.O.S. System**

- > Anchoring system with aluminium section and nylon lamella anchors.
- > For floor coverings up to 17,5 mm.
- > Continuously variable adaptation of both HEIGHT and INCLINATION.
- > For subsequent installation.
- > Concealed fastening with nylon lamella anchors.
- > Shrink-wrapped incl. lamella anchors.

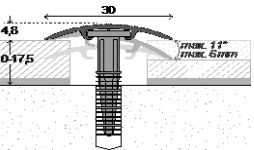

**For covering thicknesses up to 17,5 mm. Suitable for equal-height coverings and for levelling out differences in level up to 17,5 mm.**

**Aluminium Border Sections**

- > Border section for wide expansion joints and fire predection joints.
- > The 45 mm wide profile bridges the expansion joint and creates a resilient, absorbent substrate.
- > Suitable for all types of floor coverings.
- > For floor coverings up to 3 mm thick, can also be used as an expansion joint profile in the room.

**Bending machine**

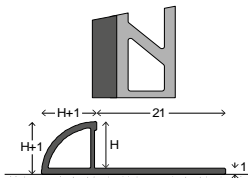

- > Suitable for the uniform deformation of flexible Border section No. 700 - 717 and T-Cover section No. 265 - 268.
- > Infinitely variable circle radius from 100 mm to infinity.
- > Smooth bending rolls with adaptable and adjustable gaps for various types of sections.
- > Scratch-resistant polyamide surfaces and low-wear silicon rolls mounted with ball bearings.
- > Stable rubber feet ensure safe positioning on any surface.

- > The system consists of an aluminium base profile as well as two PVC expansion joint strips as an alternative
- > The expansion strips are made of co-extruded hard and soft PVC and feature an optimal expansion performance
- They absorb tension reliably from the sub-floor - without tearing or unfastening from the profile
- > You can cut off 10 cm of the 260 cm long expansion joint strip and use them as spacers

- > The LED-Stair Nosing no. 219 has been designed for design floorings of 3 mm thickness.
- > The flooring has to be glued into the home screwed profile. Only the 2 mm small stop angle is visible from above.
- > The profile is suitable for straight and spiral stairs.
- > The profile can be installed on flyers and undercut steps.
- > On the step riser the flooring can either be installed under or on the vertical flank of the profile.
- > The LED-diffusor (cover cap) is optional. In case of need it has to be ordered separately.

### Two Parts Aluminium Skirting Board

- > Aluminium skirting profile for design coverings.
- > Can be used to design a skirting board with freely selectable skirting height.
- > Can also be used as a stair nosing profile or cove and cap profile for wall connection.

**Skirting sections no. 380 are combinable with edge sections nos. 709, 700, 156, 157, 169.**

### LED-Duct "LUXline"

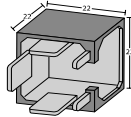

- > LUXline is suitable for placing with LED-lighting strips as well as other cables.
- > It can be separately placed on the floor, at the wall or on the ceiling.
- > In addition, it can be optimally combined with skirtings that have a base cover width of 20 - 22 mm.
- > LUXline has a flap on the front side that allows cables to be replaced - even after installation.
- > The LED channel can be glued to the wall or screwed to the wall using the slotted holes provided.
